# FAQ

## Common frequently asked questions

Q. Is the NS750 available to order?

A. Officially the NS750 will launch in January 2023. From the 1st of November 2022, you will be able to pre order the NS750 on the Partner Hub Shop with a best endeavour to ship in January 2023.

Q. Which radios are compatible with the NS750?

A. MOTOTRBO R7 and MXP600 are compatible with the NS750. For the NS750 to be detected and using the optimised audio parameters, the device will need to be upgraded to a minimum of the following software versions- TETRA: MR2022.04, MOTOTRBO: M2022.03. It is expected these software versions will become available in January 2023.

Q. Is the NX750 ATEX approved?

A. No, at this stage the NS750 is not an ATEX approved version. It is compatible with non ATEX and Intrinsically safe TIA environments only.

Q. How long is the cable?

A. Long cable is ~49.1 cm, short cable is ~25.7cm. Measured from the NS750 start of cable to the radio device interface.

Q. How many identification labels are included per pack?

A. There are 10 identification ring labels of the same colour per pack.

Q. What is the material the identification labels are made from and how rugged are the identification labels?

A. The material of the identification labels are made from polycarbonate-sheet [pc sheet]. It's the same material used in the Omni RSM Back Label as they used that in actual fire scene and is proven.

Q. What is the warranty period?

A. 1 year warranty is included as standard. Please liaise with your Motorola Sales representative or Distributor for further information.
